the 1990s, the incidence of *S. flexneri* has increased in the United Kingdom [10]. In the United States, *S. flexneri* has been reported as the most common serotype in children with acute bacterial dysentery [11].

There is a paucity of data on the epidemiology of *S. flexneri* in the United Kingdom. In the 1970s, *S. flexneri* was the most common serotype isolated from patients with acute bacterial dysentery in the United Kingdom [12]. In the 1980s, *S. flexneri* was the second most common serotype isolated from patients with acute bacterial dysentery in the United Kingdom [13].

The purpose of this study was to determine the epidemiology of *S. flexneri* in the United Kingdom. We determined the serotypes of *S. flexneri* isolated from patients with acute bacterial dysentery in the United Kingdom, and we determined the prevalence of *S. flexneri* in patients with acute bacterial dysentery in the United Kingdom.

METHODS

Study area

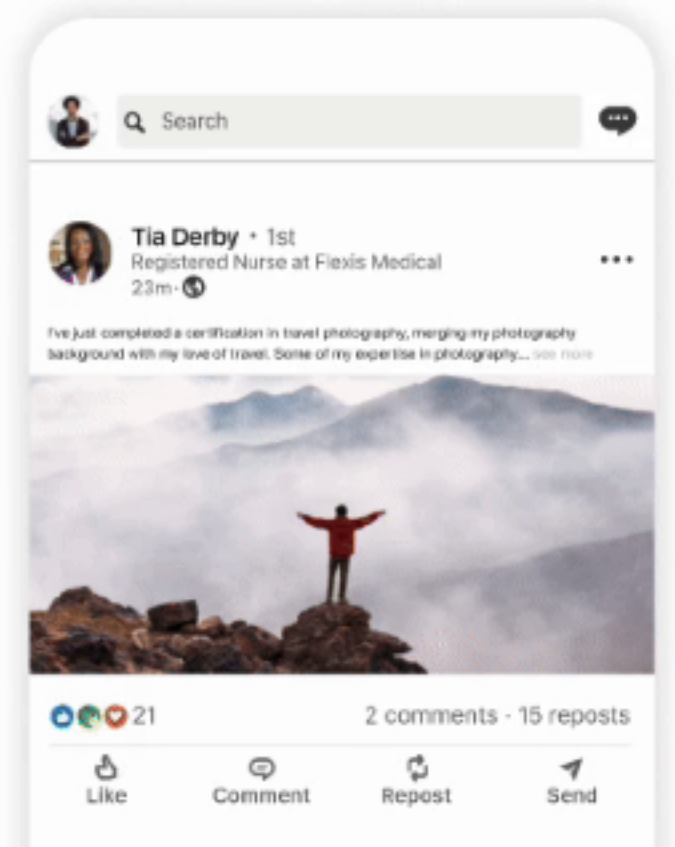

The study was conducted in the United Kingdom. The United Kingdom is a country in Europe, and it is the largest country in Europe. The United Kingdom is a country in Europe, and it is the largest country in Europe. The United Kingdom is a country in Europe, and it is the largest country in Europe.
