022PROJECT: Linkedin

the 1990s, the number of people in the UK who are aged 65 and over has increased from 10.5 million to 12.5 million, and the number of people aged 75 and over has increased from 4.5 million to 6.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the needs of older people, and the importance of the role of the family in supporting older people. The Department of Health (1999) has identified the need to develop a 'new paradigm' for the care of older people, which is based on the principles of 'active ageing' and 'positive ageing'.

The 'new paradigm' for the care of older people is based on the principles of 'active ageing' and 'positive ageing'. 'Active ageing' is defined as the process of optimising the opportunities for older people to participate in social, economic, cultural, and civic life. 'Positive ageing' is defined as the process of promoting the well-being of older people, and the quality of their lives.

The 'new paradigm' for the care of older people is based on the principles of 'active ageing' and 'positive ageing'. The 'new paradigm' for the care of older people is based on the principles of 'active ageing' and 'positive ageing'. The 'new paradigm' for the care of older people is based on the principles of 'active ageing' and 'positive ageing'.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office of National Statistics 1999).

There is a growing awareness of the need to address the needs of older people in the community. The Department of Health (1999) has published a strategy for older people, which sets out a vision for the future of older people's services. The strategy is based on the principle of 'ageism', which is the discrimination against older people on the basis of their age. The strategy aims to ensure that older people are treated with respect and dignity, and that their needs are met. The strategy also aims to ensure that older people are able to live independently and actively in the community.

The strategy is based on the following principles: (1) older people should be treated with respect and dignity; (2) older people should be able to live independently and actively in the community; (3) older people should be able to access the services they need; and (4) older people should be able to participate in the decisions that affect their lives. The strategy also sets out a number of objectives, which are to: (1) improve the quality of life of older people; (2) reduce the inequalities between different groups of older people; (3) ensure that older people are able to access the services they need; and (4) ensure that older people are able to participate in the decisions that affect their lives.

The strategy is based on the following principles: (1) older people should be treated with respect and dignity; (2) older people should be able to live independently and actively in the community; (3) older people should be able to access the services they need; and (4) older people should be able to participate in the decisions that affect their lives.
