02 PROJECT: Linkedin

the *Journal of the American Medical Association* (JAMA) and the *New England Journal of Medicine* (NEJM).

These journals are the most widely read and cited in the field of medicine. They are also the most expensive, with subscription rates for institutions ranging from \$10,000 to \$20,000 per year.

The *Journal of the American Medical Association* (JAMA) is the largest of the two, with a circulation of over 100,000 copies per year. The *New England Journal of Medicine* (NEJM) is the second largest, with a circulation of over 50,000 copies per year.

Both journals are published by the American Medical Association (AMA). The AMA is a professional association of physicians and surgeons, and it is the largest of its kind in the United States.

The AMA's primary purpose is to represent the interests of its members, and it does this through a variety of activities, including lobbying, public relations, and the publication of journals.

The *Journal of the American Medical Association* (JAMA) and the *New England Journal of Medicine* (NEJM) are both highly respected and influential in the medical community. They are also both highly profitable, with the AMA's total revenue for 2003 exceeding \$1 billion.

The AMA's success is largely due to its control over the two journals. The AMA owns 100% of both JAMA and NEJM, and it is the only publisher of both.

The AMA's control over the journals has been a source of controversy for many years. Critics argue that the AMA's primary motivation for publishing the journals is to generate profit, rather than to advance the medical profession.

Others argue that the AMA's control over the journals is necessary to ensure the quality and integrity of the medical literature. They argue that the AMA's primary motivation for publishing the journals is to represent the interests of its members, and that this is best done through the publication of high-quality journals.

The AMA's control over the journals has also been a source of controversy for its members. Some members argue that the AMA's primary motivation for publishing the journals is to generate profit, rather than to represent their interests.

Others argue that the AMA's control over the journals is necessary to ensure the quality and integrity of the medical literature, and that this is best done through the publication of high-quality journals.

The AMA's control over the journals has also been a source of controversy for the medical community as a whole. Some members of the medical community argue that the AMA's primary motivation for publishing the journals is to generate profit, rather than to advance the medical profession.

Others argue that the AMA's control over the journals is necessary to ensure the quality and integrity of the medical literature, and that this is best done through the publication of high-quality journals.

The AMA's control over the journals has also been a source of controversy for the public. Some members of the public argue that the AMA's primary motivation for publishing the journals is to generate profit, rather than to advance the medical profession.

Others argue that the AMA's control over the journals is necessary to ensure the quality and integrity of the medical literature, and that this is best done through the publication of high-quality journals.

The AMA's control over the journals has also been a source of controversy for the medical industry as a whole. Some members of the medical industry argue that the AMA's primary motivation for publishing the journals is to generate profit, rather than to advance the medical profession.

Others argue that the AMA's control over the journals is necessary to ensure the quality and integrity of the medical literature, and that this is best done through the publication of high-quality journals.

the *Journal of the American Medical Association* (JAMA) and the *New England Journal of Medicine* (NEJM).

These two journals are the most widely read and cited in the field of medicine. They are also the most expensive, with JAMA costing \$1,200 per year and NEJM costing \$1,500 per year.

Other journals in the field include the *British Medical Journal* (BMJ), the *Lancet*, and the *Annals of Internal Medicine* (AIM).

These journals are also widely read and cited, but they are not as expensive as JAMA and NEJM. The BMJ costs \$600 per year, the *Lancet* costs \$700 per year, and AIM costs \$800 per year.

There are also many other journals in the field, but they are not as widely read and cited as the ones mentioned above.

For example, the *Journal of the American Society of Nephrology* (JASN) costs \$1,200 per year, the *Journal of the American Society of Hypertension* (JASH) costs \$1,200 per year, and the *Journal of the American Society of Geriatrics* (JAGS) costs \$1,200 per year.

These journals are also widely read and cited, but they are not as expensive as JAMA and NEJM.

There are also many other journals in the field, but they are not as widely read and cited as the ones mentioned above.

For example, the *Journal of the American Society of Radiology* (JASR) costs \$1,200 per year, the *Journal of the American Society of Ophthalmology* (JASO) costs \$1,200 per year, and the *Journal of the American Society of Pathology* (JASP) costs \$1,200 per year.

These journals are also widely read and cited, but they are not as expensive as JAMA and NEJM.

There are also many other journals in the field, but they are not as widely read and cited as the ones mentioned above.

For example, the *Journal of the American Society of Microbiology* (JASM) costs \$1,200 per year, the *Journal of the American Society of Immunology* (JASI) costs \$1,200 per year, and the *Journal of the American Society of Pharmacology* (JASP) costs \$1,200 per year.

These journals are also widely read and cited, but they are not as expensive as JAMA and NEJM.

There are also many other journals in the field, but they are not as widely read and cited as the ones mentioned above.

For example, the *Journal of the American Society of Nutrition* (JASN) costs \$1,200 per year, the *Journal of the American Society of Endocrinology* (JASE) costs \$1,200 per year, and the *Journal of the American Society of Cardiology* (JASC) costs \$1,200 per year.

These journals are also widely read and cited, but they are not as expensive as JAMA and NEJM.

There are also many other journals in the field, but they are not as widely read and cited as the ones mentioned above.
